

Recommended Textbooks for Anatomy and Anatomical dissection

(for both General Medicine and Dentistry course!)

Proper Anatomy Textbooks (you must really pick up one of these to get the understanding):

Waschke, Bockers, Paulsen: Sobotta – Anatomy textbook, Elsevier, 1st ed., 2019

- this is THE primary textbook for the course, used by all the teachers and examiners!

Alternatives (useful for those preparing to practice in the US, or at least taking USMLE):

Moore, Agur, Dalley: Essential Clinical Anatomy, 5th edition Lippincott Williams and Wilkins 2014

Gray's Anatomy for Students: With Student Consult Online Access, 5th ed., 2023, by Richard L. Drake, A. Wayne Vogl, and Adam W. M. Mitchell (you are welcome to try the full version, but it is rather voluminous!)

Snell: Clinical Anatomy by systems, Lippincott Williams and Wilkins 2007 (also exists in “by the region” version)

Pocket atlases from Thieme – good for the practicals:

Platzer: Color Atlas Anatomy – Vol. 1 Locomotor System, 7th ed., Thieme 2014

Fritsch, Kuehnel: Color Atlas Anatomy – Vol. 2 Internal Organ, 5th ed., Thieme 2014

Color Atlas of Human Anatomy, Vol. 3: Nervous System

By **Kahle, Werner; Frotscher, Michael**

- all are also available ONLINE via e-books through the Library!

Neuroanatomy

Crossman, Neary: Neuroanatomy, An Illustrated Colour Text, 2020 edition, Elsevier

- this is THE primary textbook for the neuroanatomy course (summer semester), used by all the teachers and examiners!

Petrovický: Basic Neuroanatomy I. and II. Praha, Karolinum 1997 (great for pre-exam revision)

Histology

Mescher: Junqueira's Basic Histology: Text and Atlas, 14th edition, McGraw-Hill Medical 2015 (we call it “microscopic anatomy”) – also recommended by the histologists!

Embryology

Sadler: Langman's Medical Embryology, 14th edition, Lippincott Williams and Wilkins 2019 (really, you DO need to learn how things came into being and their proper place, since the topic is NOT cover in regular Anatomy textbook EXCEPT Sobottas, recommended as the primary one!)

Atlases

Paulsen, Waschke: Sobotta Atlas of Human Anatomy, 17th ed., English/Latin, *Musculoskeletal system, internal organs, head, neck, neuroanatomy*, Elsevier 2023

or **Grim M, Naňka O, Helekal I:** Atlas of Human Anatomy I+II, 1st ed., Grada 2014, 2017

or **Gilroy, MacPherson, Schuenke, Schulte, Schumacher:** Atlas of Anatomy, 3rd edition with Latin Nomenclature, Thieme 2016

or **Netter**: Atlas of Human Anatomy, 8th Edition, Elsevier 2022

or **Agur, Dalley**: Grant's Atlas of Anatomy, 12th ed., Lippincot Williams and Wilkins 2016

or **Köpf-Maier**: Wolf-Heidegger's Atlas of Human Anatomy Vol.1+2, 6th edition, Karger 2005

or **Drake, Vogl, Mitchell, Richardson**: Gray's Atlas of Anatomy, 3rd ed., Elsevier 2014

or **Gosling, Harris, Humpherson, Whitmor, Willan**: Human Anatomy, Color Atlas and Textbook, 6th Edition, Elsevier 2016 – photographic atlas of gross anatomy, clearly labelled line drawings for each photograph

(does not really matter which one do you pick up, and older editions are fine, too!)

Dissection manual

Detton: Grant's Dissector, 16th edition, Lippincot Williams and Wilkins 2016

Topographic Anatomy

Stingl J, Grim M, Druga R: Regional Anatomy, 2011, Grada-Karolinum, Prague

Prague, September 28, 2023

Assoc. Prof. Ondrej Nanka, MD., PhD

Prof. David Sedmera, MD, DSc.
